

## All About Food Passport

Read With Me! With Miss Jenny

Today we are going to do things a bit differently. First we are going to, of course do our circle time, including our books. Then we are going to do a quick game (gross-motor activity). Next, we are going to create our own books, which will take longer than our usual activities. After that, we will do some more centers, do our craft, and have a snack. At the end, I would like to have a closing circle.

Food Puzzle, find the place where each food fits	Different Color Foods, pick a stick and think of as many foods as you can that are that color. There are books to help you come up with ideas.
Test Your Sense of Smell, try to smell each cup and write down what you think is in each cup. We will go over the answers at the end....	Healthy Vs. Unhealthy Foods, separate the foods into foods that are healthy and those that are not

\*\*You also have the options to free play, use play dough, pretend grocery shop, and read books
